PROPOSAL:

1.1. This statement is for the Listed Building consent application at Flat 1 30 Hornton Street (consisting of a Lower Ground Floor and Ground Floor Flat). The works are to a single family dwelling within a Grade II listed mansion block.

1.2. The development aims to improve circulation within the dwelling, preserve the appearance of the surrounding conservation area and restore the architectural character of the property (Policy CL3).

EXISTING:

2.1. The property is currently a two bedroom single family dwelling (class C3 dwellinghouses) and there is no intended change of use.

2.2. The applicant believes that the alterations are required as the current state of the dwelling is in a poor condition.

2.3. The interior joinery and plasterwork is not in keeping with the original character of the property.

CONCLUSION:

3.1 We feel that the proposed alterations to the dwelling will be sympathetic to the original period of the property and will allow the dwelling to flow more coherently. The works will restore the interior joinery and plasterwork to be sympathetic to the period of the mansion block. No work will impact the detailing of external elevations.
